Solutions for hotels and guesthouse facilities

Hotels play a crucial role in modern architecture, and with the rapid growth of the economy, selecting the right hotel door hardware has become increasingly important. As hotel management reaches new heights, especially for four-star and five-star hotels that must meet international standards, the choice of hardware should align with key principles such as comfort and aesthetic appeal, scientific and intelligent design, efficient management, emergency evacuation readiness, property protection, privacy protection, and user safety.

Hotel projects vary in classification and application scenarios, including star-rated hotels, resort hotels, business hotels, budget hotels, inns, motels, apartment hotels, and quarantine hotels. Given the extensive use of hardware products in hotel projects, the requirements for these products are stringent. Hotels experience high and diverse foot traffic, making it essential to select mid-to-high-end hardware products. These products must offer fast supply, quick response times, high service efficiency, and excellent cost-performance value.

Apartment Smart Lock Series

Introduction to KINLONG Intelligent Apartment Lock System

The KINLONG Smart Apartment System is suitable for hotel, apartment, homestay, and individual household user environments. It can freely switch between PC and mobile apps according to the usage scenarios, greatly expanding the application boundaries of smart locks. It enables different scene modes based on the same set of hardware, and can be paired with a gateway for remote management, remote unlocking, lock status monitoring, issuing temporary password, authorizing scanning QR codes to unlock, and meeting the needs of both hotels and apartments/homestays. Solving various problems encountered in management comprehensively and improving management efficiency is the best choice for centralized hotels, apartments/homestays to achieve intelligent management.

Functions & Charateristics

· Appearance: conceal keyhole design, beautiful
· Customized pattern can be printed on induction cards
· Provide computer management software/mobile app/WeChat mini program, three system synchronization
· Provide third-party interface protocols
· Data synchronization between computer and mobile devices
· Support employees and their permission management
Support multiple door opening methods (APP, mini program, card, password)
· Cards can be reported lost and passwords can be changed
· Open door records can be viewed at any time (computer, app)
· Real time display of room status and type
· Support scheduled passage
· Supports multiple languages
· This apartment system comes standard with cloud docking and can be customized, upgraded, and deployed locally (P133)

Technical parameters, functions and characteristics

Technical parameters

· Power supply: 4 1.5V AA alkaline batteries (optional).
· Static current: <50uA, dynamic current: <200mA.
· Applicable door thickness: 40~50mm , please specify if it exceeds 50mm.
· Low-Voltage Reminder: When voltage drops below 4.8V, an audible and visual alarm will activate, allowing up to 50 more door openings.
· Unlocking records: Networking allows for uploading the latest records.
· Working temperature:-25 ℃ - +60℃ , working humidity: 15% - 95%RH.
· Control method:card reading distance: <3 cm, reading and writing time: <1 second.
· Door Opening Direction: Distinguish by style to determine if it is adjustable.
· Executive standard: JG/T 394-2012 "General Technical Requirements for Building Intelligent Door Locks".
· Factory enabled: password enabled.

Power Switch (all-in-one card)

SKG65001   SKG65002   SKG65005   SKG65006

Power switch for M1 card hotel lock system;
Designed for contactless card power extraction;
Delays power cut-off by 8-15 seconds after card removal to ensure energy efficiency and safety;
Power extraction method: Intelligent detection (identifies whether the card is an M1 card);
Main Material: Flame retardant PC ;
Overall Dimension: 86 × 86 × 50mm ;
Working voltage: 220V Working current: 30A Working frequency: 13.56MHz ;
Working mode: electromagnetic induction, red light indication when not working
Wiring: Firewire input, output, zero line.

V8 System Hotel Lock Accessories

SFK65008   Card issuer

Suitable for reading and writing of high-frequency Mifare-1 cards.
Must be used in conjunction with the "Kinlong Hotel Management System" software.
Read/write smart card through RF non-contact mode.
Connects to and operates from a computer via USB serial port.
For card authorization and card cancellation

SCJ65008   Liquid Crystal Handheld

Installation card function, no need to make installation card, convenient for room number setting;
Fast and accurate time calibration function, real-time time calibration;
Expert diagnosis function, convenient for system diagnosis and maintenance;
Viewing various card information (only support Mifare card door lock)
Collecting and exporting door-opening records, clearer room management;
Fast check-out operation, more convenient check-out operation;
Door lock firmware upgrade, without removing the lock to change the door lock function;
